

Course Title	Introduction to Computers for Logistics				
Course Code	COMP111				
Course Type	Theoretical and practical				
Level	Higher Diploma				
Year / Semester	1 st Year / 1 st Semester				
Teacher's Name	Pratzioti Sophia				
ECTS	4	Lectures / week	1	Laboratories / week	1
Course Purpose and Objectives	This is an introductory course to basic computer operations, with the aim to help learners acquire the necessary knowledge and skills needed for their studies in Logistics Programme, while at the same time encourage them to develop lifelong skills for efficient use of Information and Communication Technologies (ICT).				
Learning Outcomes	<p>Upon successful completion of this course, students are expected to:</p> <ul style="list-style-type: none"> • Understand key concepts relating to ICT, computers, devices and software. • Be able to work effectively on the computer; therefore demonstrate skills using computers as a tool to produce, research, retrieve, and save information. • Know about the main concepts of file management and be able to efficiently organize files and folders. • Be able to use effectively word processing software, such as Microsoft Word, to create, prepare/produce and modify a basic document to match the purpose and target audience. • Be able to use spreadsheet software, such as Microsoft Excel to create and modify workbooks. • Will enable students to master the more advanced and certain functions of spreadsheet applications, enabling them to produce more sophisticated reports, and to perform complex mathematical and statistical calculations, thus saving time and improving productivity in the completion of tasks in the logistic sector. • Be able to use suitable software tools, such as Microsoft PowerPoint to create presentation slides and reports to display data appropriate to purpose and audience along with to meet the needs of the audience. • Familiarize with web browser software, such as Google Chrome, Mozilla Firefox, and Microsoft Edge (Internet Explorer) to search, retrieve and save information from the web. • Be able to use the web browser and manage browser settings, bookmarks, and web outputs. • Be able to use search effectively for online information and critically evaluate web content. • Be able to send, receive e-mails and manage e-mail settings. • Be able to organize and search e-mails and use online calendars. 				
Prerequisites	None		Co-requisites	None	

Course Content

Themes to be discussed:

- Computer Essentials
 - Computers and Devices
 - Hardware and Software
 - Start Up, Shut Down
 - Using Desktop, Icons, and Windows
 - File Management
 - Introducing Files and Folders
 - Organising Files and Folders
 - Storage and Compression
- Word Processing Software (using Microsoft Word)
 - Using the Application
 - Working with Documents
 - Document Creation
 - Enter, Select and Edit Text
 - Copy or move text within or between documents
 - Create, save, retrieve, edit and print documents.
 - Text and Paragraph Formatting
 - Use the bold, italic, underline, left, centre, right and fully justification.
 - Page Layout and Page Setup
 - Set margins, line spacing, tabs, and page numbers.
 - Use search & replace, spell check and thesaurus.
- Spreadsheets Software (using Microsoft Excel)
 - Using the Application
 - Working with Spreadsheets
 - Create, save, retrieve, edit and print worksheets.
 - Managing Worksheets and Cells
 - Formulas and Functions
 - Create mathematical and logical formulas using standard spreadsheet functions.
 - Use good practice in formula creation and recognize error values in formulas.
 - Relative Vs Absolute Cell References
 - Formatting Numbers/Dates, Contents, Alignment, and Border Effects
 - Worksheets and Page Setup
 - Create and Edit Charts
 - Apply and use advanced and selected Excel functions
- Presentation Software (using Microsoft PowerPoint)
 - Using the Application
 - Working with Presentations
 - Developing a Presentation
 - Using slides and master slides
 - Handling and Formatting Text and Tables
 - Using Charts and Organisation Charts
 - Insert and Manipulate Graphical Objects
- Online Essentials
 - Understand web browsing and online security concepts.
 - Use the web browser and manage browser settings, bookmarks, web outputs.
 - Search effectively for online information and critically evaluate web content.

	<ul style="list-style-type: none"> ○ Understand concepts of online communities, communications and e-mail. ○ Send, receive e-mails and manage e-mail settings. ○ Organise and search e-mails and use online calendars.
Teaching Methodology	Course topics are presented by a variety of teaching approaches including lectures and computer lab exercises.
